ProPath

LIGHTWEIGHT & MANEUVERABLE

The ProPath Powerhead is lightweight – it's easier to push and easier to clean. No more lugging a heavy powerhead from room to room. The narrow wheel placement allows for better maneuverability around corners and furniture.

4-HEIGHT ADJUSTMENT

The ProPath Powerhead features four height settings for all carpet types. From Area Rugs to Ultra-Plush Carpets – now there's no need to switch brushes between rooms. Simply press the foot switch and select one of 4 levels to accommodate your needs.

ULTRA-PLUSH CARPET COMPATIBLE

The ProPath Powerhead features a unique air diverter that adjusts the airflow when set for Ultra-Plush Carpets. While at this setting, the Powerhead is easier to push and won't feel like it's "sticking" to the carpet like some other powerheads do.
